

# **AMS 4981 - TITANIUM 6246**

The main characteristics of 6246 are being light weight with exceptional strength and corrosion resistance. This high-performance alloy contains 6% aluminum and 4% zirconium along with titanium and trace elements.

The addition of aluminum and zirconium gives 6246 titanium increased strength compared to commercially pure titanium grades. It has an ultimate tensile strength around 1100 MPa, nearly double that of the Ti-6Al-4V alloy. Yet 6246 remains relatively light, with a density of 4.54 g/cm3.

Components made from 6246 can withstand tremendous mechanical stresses while remaining incredibly light.

6246 titanium offers great resistance to corrosion, the aluminum and vanadium stabilise the alloy against oxidation and prevent degradation.

Like other titanium alloys, 6246 is incredibly durable with a long service life. Products made from this alloy can withstand heavy wear and tear over years of use with minimal maintenance required. The material does not suffer from fatigue, galling, or seizing issues.

From a manufacturing perspective, 6246 titanium can be readily formed using standard metalworking techniques like machining, welding, and forming. However, the material is considered more difficult to process compared to other titanium grades due to its higher strength.

Whether used to construct aircraft components, high-performance automotive parts, or professional-grade sports gear, 6246 titanium delivers an unbeatable combination of strength, light weight, and corrosion resistance.

### Key Features and Benefits

- Superior strength at high temperatures up to 538°C (1000°F)
- · Excellent corrosion resistance
- · Outstanding strength-to-weight ratio

Max

- · Exceptional durability
- · Long service life

#### **Applications**

This versatile alloy excels in demanding environments, particularly in:

- · Aerospace components
- · Aircraft structural parts
- · High-performance automotive parts
- · Marine applications
- · Industrial equipment

#### **Performance Characteristics**

The alloy undergoes rigorous solution and precipitation heat treatment, delivering:

- · High tensile strength
- · Excellent yield strength
- · Good elongation properties
- · Strong resistance to fatigue
- Reliable performance at elevated temperatures

#### Corrosion Resistance

AMS4981 offers outstanding resistance to corrosion. The alloy's chemical composition creates a protective oxide layer, providing natural defence against environmental factors. This makes it ideal for applications in aggressive environments.

## **Quality Assurance**

Every batch of our AMS4981 products undergoes:

- · Comprehensive chemical analysis
- · Mechanical property testing
- Microstructure examination
- · Surface quality inspection

#### Available Forms

We supply 6246 in round bar, flat bar and forgings in annealed and Solution Treated & Aged conditions

**Industry Standards** 

Our AMS4981 products fully comply with:

• SAE Aerospace Material Specification

09/09/2025 16:56 2 of 5

<sup>\*</sup> Every effort has been made to ensure that our technical specifications are accurate. However, technical specifications included within Dynamic Metals Ltd should be used as a guideline only and are subject to change without notice.

- · International quality standards
- · Industry-specific requirements

## Advantages of AMS4981

#### Durability:

- · Exceptional corrosion resistance
- · Outstanding fatigue properties
- · Reliable high-temperature performance
- · Excellent strength-to-weight ratio

### **Processing Benefits:**

- · Good machinability
- · Consistent heat treatment response
- · Reliable welding characteristics
- · Stable microstructure

### Why Choose Dynamic Metals?

- · Extensive stock availability
- · Full material certification
- · Expert technical support
- · Competitive pricing
- · Fast UK delivery
- · Complete traceability

This material is widely used in modern aerospace and motor sport applications, where reliability and performance cannot be compromised. Its careful regulation through AMS4981 ensures consistent quality across the aerospace industry. Contact our technical team today to discuss your AMS4981 requirements. We're here to help you select the right product for your application.
